

Vinayaka Punjabi

Software Tester

Profile

I have over 2 years of experience as a software tester and front-end developer. I am currently learning Dutch fluently and looking for a company where I can share and enhance my skills and experience.

Work Experience

Test Engineer | My Jewellery, 's-Hertogenbosch

- Performed end-to-end testing of the complete software to ensure proper functionality.
- Created and executed manual and automated test scripts covering various software aspects.
- Designed and wrote automation scripts using Playwright and Pactum JS, managed in GitHub repository.
- Conducted integration, regression, and smoke testing before each release to ensure product readiness.

Associate Consultant | Revolve Solutions

- Designed and built a client account web application using HTML, JavaScript, and CSS, ensuring responsiveness across devices.
- Developed and executed manual test plans and cases for UI and REST APIs.
- Performed performance testing under simulated high traffic and poor network conditions.
- Managed sprint backlog by organizing test tasks, tracking defects, and participating in agile meetings.

QA Tester | Silica Institute

- Executed test cases to ensure website quality and documented the results.
- Identified, logged, and reported bugs and glitches; assisted in defect resolution.
- Reviewed test procedures, developed scripts, and tracked defects.
- Supported the Scrum Master in various scrum activities.
